(Effective from May 1, 2023)

Special Clauses for MEXT Advanced Research Infrastructure for Materials and Nanotechnology in Japan

A Non-proprietary Research user ("User") who uses the dedicated experimental equipment owned by the Japan Atomic Energy Agency ("JAEA") at the large-scale synchrotron radiation facility SPring-8 on a non-exclusive basis shall use the equipment in accordance with the following clauses in addition to the Facility Use Agreement.

Article 1. (Handling of Data)

1. User shall store the data obtained through using the above related facilities.
2. Definitions of terms used in the MEXT Advanced Research Infrastructure for Materials and Nanotechnology in Japan ("ARIM") shall be as follows.

(1) "Data Editing" means to convert the experimental data obtained by User through using the above related facilities into a format with high versatility and readability, and to add metadata regarding the measurement conditions, so that persons other than User can utilize the data for further analysis, *etc*.

(2) "Data Sharing" means to provide structured data for a fee to party wishing to user the data after a Non-Shared Use Period designated by Uesr.

3. User may register all or part of the duplicated data obtained through using the above related facilities in the database of the National Institute for Materials Science through the LICENSEE or the University of Tokyo, a national university corporation, for use in the ARIM.
4. In the case of the preceding paragraph, data management, data editing and data sharing shall be performed by the ARIM.
5. When registering data, User shall not be responsible for guaranteeing the quality of the registered data.
