

Carbonate apatite with high carbonate group content

- Low-cost, high-efficiency removal of strontium 90, cadmium, lead, copper, etc.
- High-performance adsorbent made from food waste material
- Simultaneous remediation of environmental pollution and food waste problems

Keywords : Toxic metal ions, environmental purification, contaminated water, sustainable society

Stage of Technology

Fields of use

- Decontamination of the environment
- Recovery and recycling of rare metals
- Nuclear power, Environment, civil engineering, construction

Information of intellectual property

Patent No. US11577216
Patent No. US11649166

Technical details
